

# Add Go1 courses to a Learning Path

Add Go1 courses directly to Learning Paths and certifications. Create Learning Paths that include a Go1 playlist, so learners can access selected Go1 courses as part of their training.

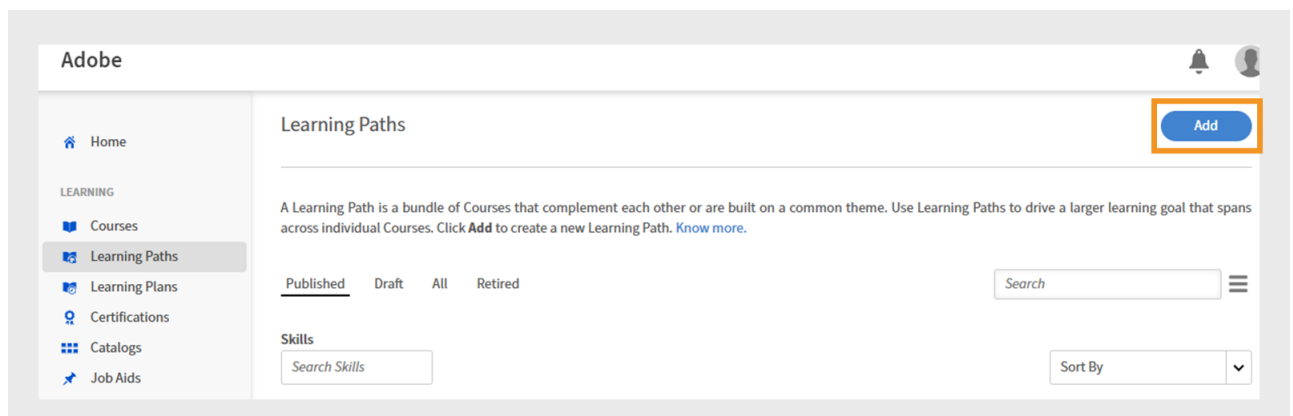

[!INFO]

You need an active Go1 license to add Go1 courses to Learning Paths or certifications. View this [article](#) to learn more about Go1 license details.

## Create a learning path

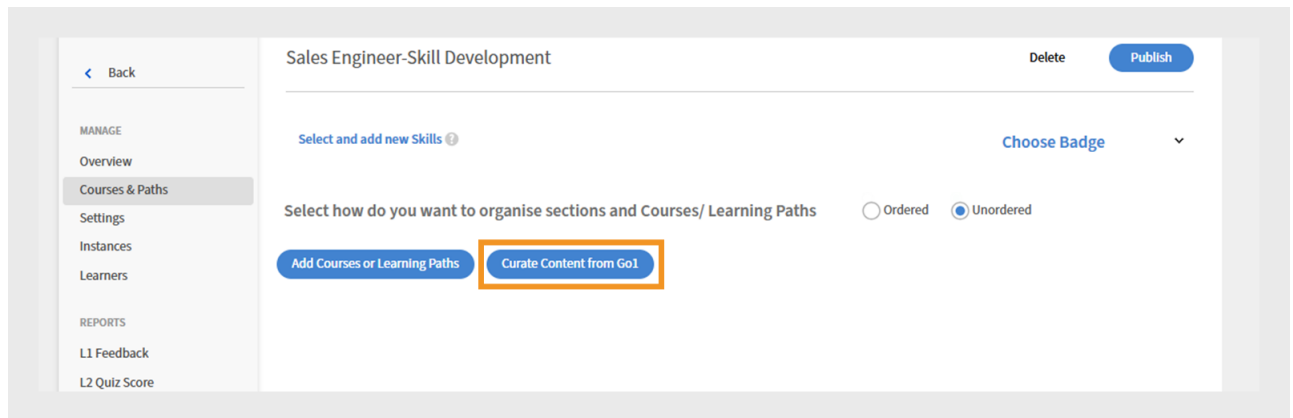

To create a learning path with Go1 courses:

1. Log in to Adobe Learning Manager as an administrator.
2. Select **[!UICONTROL Learning Paths]** in the left navigation pane.
3. Select **[!UICONTROL Add]**.

*Select Add in the Learning Paths section to create and organize new structured training programs for your learners*

4. Type the required details and select **[!UICONTROL Save]**. View this [article](#) for more information.
5. You can add courses to a learning path in the following ways:
  - **[!UICONTROL Add Courses or Learning Paths]**: Add existing courses or learning paths available in Adobe Learning Manager.
  - **[!UICONTROL Curate content from Go1]**: Add courses from the Go1 platform.
6. Select **[!UICONTROL Curate content from Go1]**.

*Add Go1 courses to your Sales Engineers Skill Development playlist to expand learning options with curated third-party content*

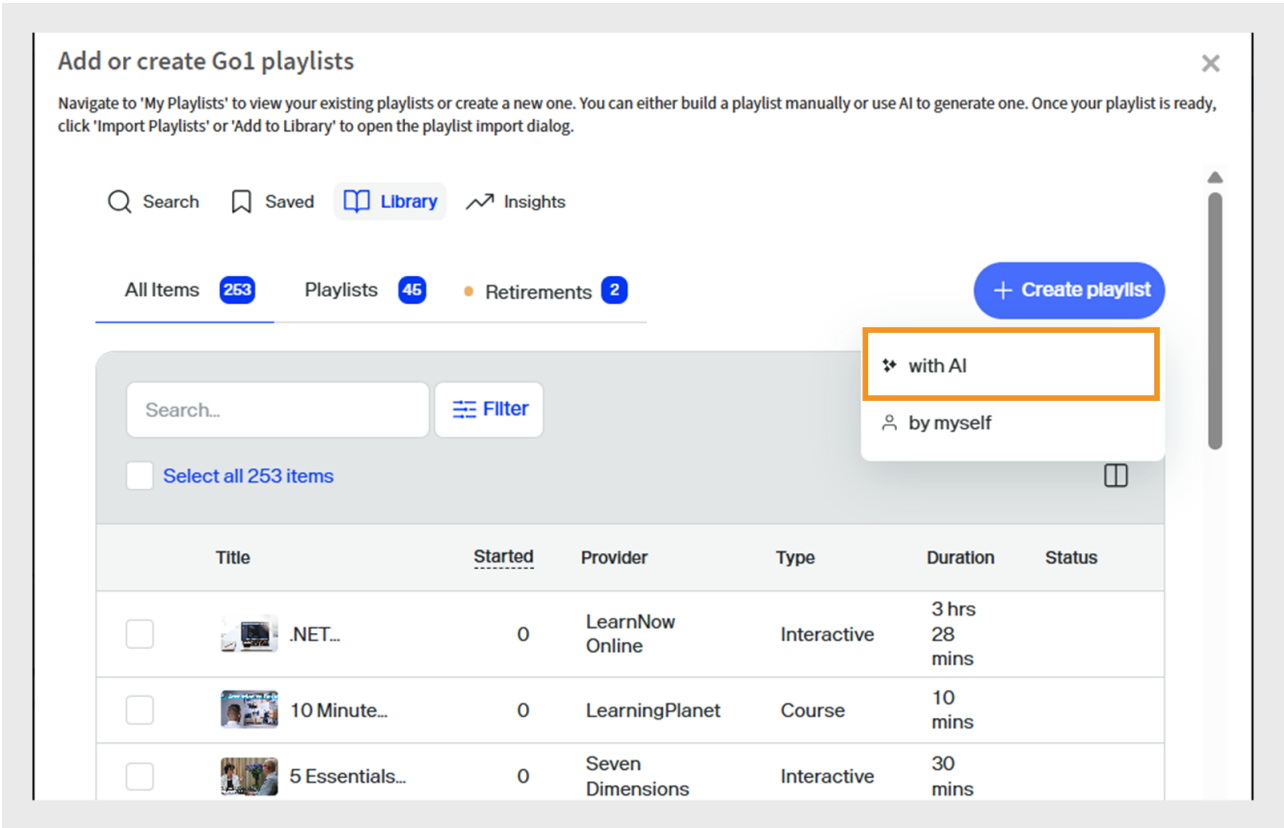

7. In the **[!UICONTROL Library]**, search for and select **[!UICONTROL Create playlist]** and choose from one of the following: a. **[!UICONTROL with AI]**: Create a playlist with the help of AI. b. **[!UICONTROL by myself]**: Create a playlist by manually adding courses to it.

### Create a playlist with AI\*\*

Administrators can type the playlist description in the AI prompt. The AI will curate the related courses and create a playlist based on the requirements. AI generates playlists by interpreting the learning goal or prompt provided by the user. When creating a playlist, admins can select to curate content 'with AI' which allows the system to use large language models to understand the specified learning objectives and content preferences like duration and type. The AI then searches the content library for relevant learning objects that match these criteria.

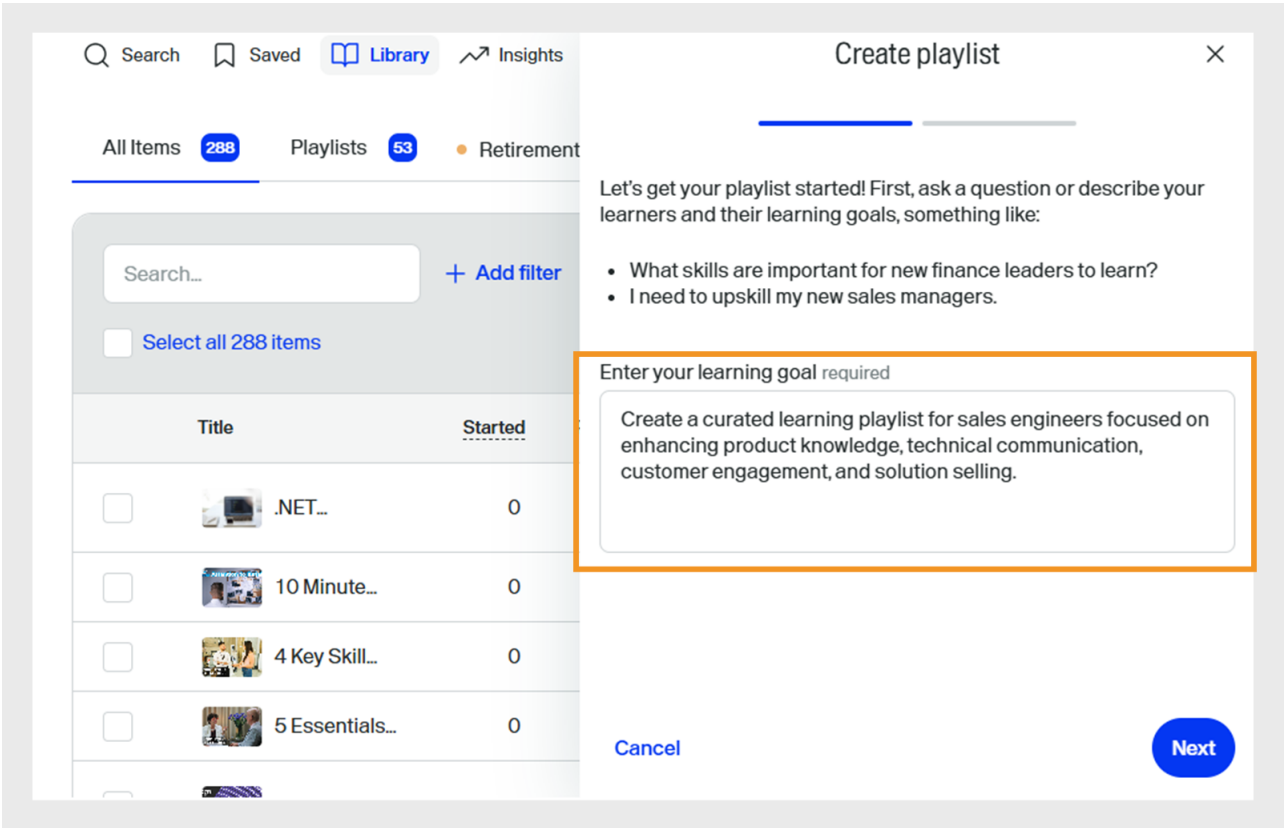

To create a playlist with AI:

1. Select **[!UICONTROL Create playlist]** and then select **[!UICONTROL with AI]**.

Create curated playlists with AI, which enables automated course recommendations tailored to learner needs

2. Type a short description about your playlist in the **[!UICONTROL Enter your learning goal]** text field. For example, *Create a curated learning playlist for sales engineers focused on enhancing product knowledge, technical communication, customer engagement, and solution selling.*

Type your learning goal to create a custom playlist, helping Adobe Learning Manager recommend targeted courses tailored to your learners' needs

3. Select **[!UICONTROL Next]**. The prompt displays the required skills, course duration, and course type for selection.
4. Select the required skills.

Add or create Go1 playlists

Navigate to 'My Playlists' to view your existing playlists or create a new one. You can either build a playlist manually or use AI to generate one. Once your playlist is ready, click 'Import Playlists' or 'Add to Library' to open the playlist import dialog.

**Description**  
A curated collection of courses designed to enhance product knowledge, communication, customer engagement, and solution selling for sales professionals.

**Improve writing**  
**Generate title**

*Go1 playlist creation screen with AI options to enhance the playlist title*

9. Change the description using the available AI options:

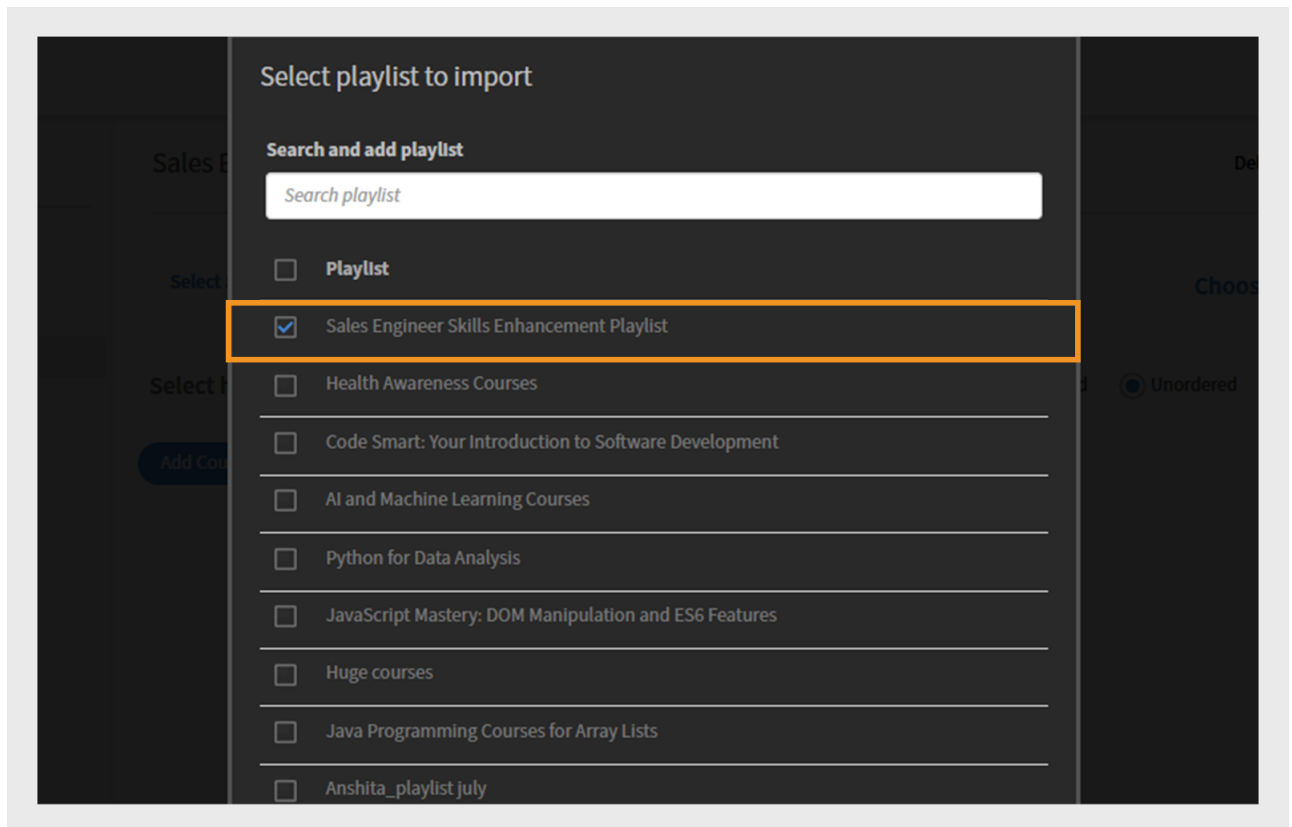

- **[!UICONTROL Improve writing]**: Refine the existing description to make it clearer.
- **[!UICONTROL Generate description]**: Create a new description based on the content or context automatically.
- **[!UICONTROL Make it shorter]**: Shorten the text or title while keeping the main idea.

*Go1 playlist creation screen with AI options to enhance the playlist description*

10. Select **[!UICONTROL Add item]** to add more courses to the playlist.
11. Select **[!UICONTROL Publish]** to create the playlist. You can create additional playlists in Go1 and add them to a learning path.
12. Select **Yes** in the confirmation prompt.
13. Select the playlist from the **[!UICONTROL Select playlist to import prompt]**.

*Select and import the Sales Engineer Skills Enhancement Playlist from the Go1 Library in Adobe Learning Manager*

14. Select **[!UICONTROL Add Playlists to Learning Path]** and then **[!UICONTROL Publish]**.

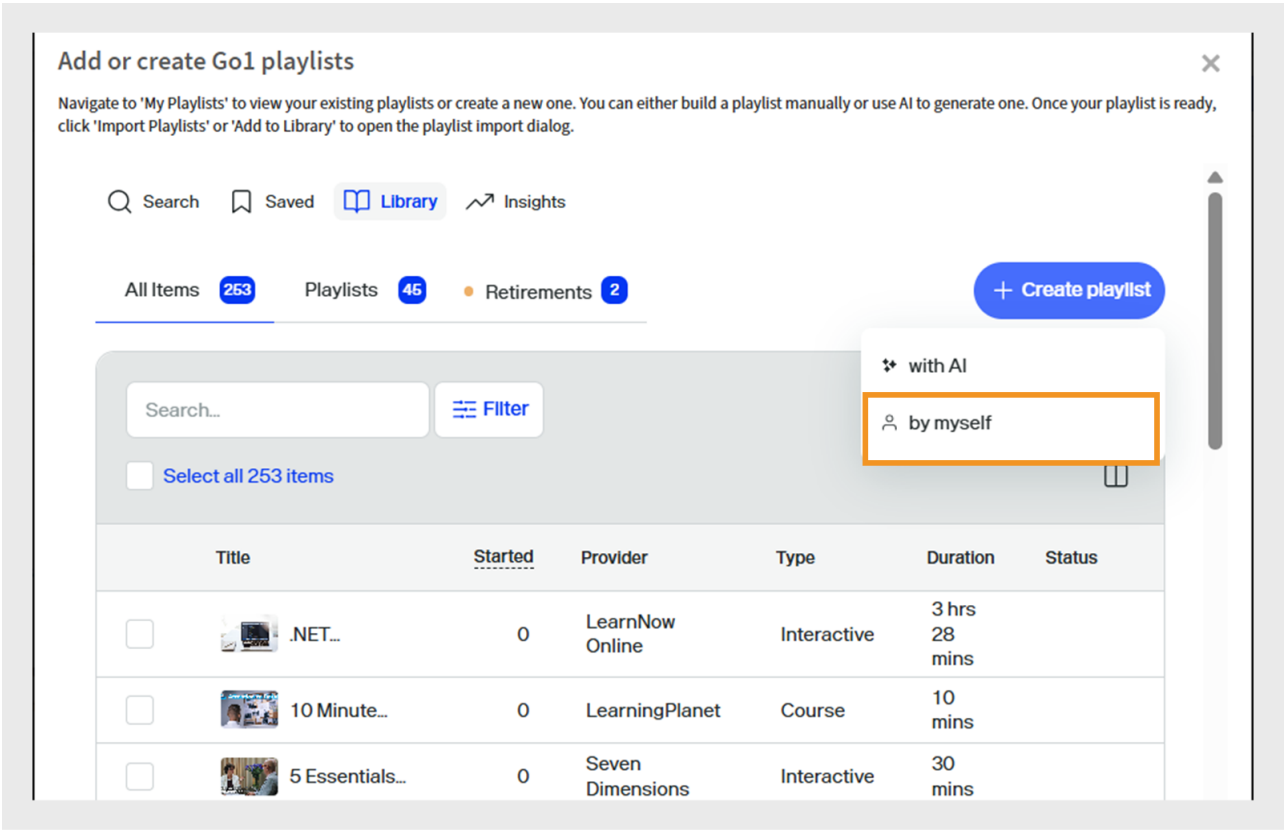

The courses in the playlist will be added to the Learning Path. Administrators can then enroll learners, who can immediately begin taking the courses.

## Create a playlist manually

Manually select courses that best match learners' requirements and curate additional relevant courses.

To create a playlist manually:

1. Select **[!UICONTROL Create playlist]** and then select **[!UICONTROL by myself]**.

Manually create a playlist giving administrators full control to curate courses based on specific learner needs

- 2. Browse and add an image to the playlist by selecting **[!UICONTROL Select Image]**.
- 3. Type the title and description of your playlist.

Add or create Go1 playlists

Navigate to 'My Playlists' to view your existing playlists or create a new one. You can either build a playlist manually or use AI to generate one. Once your playlist is ready, click 'Import Playlists' or 'Add to Library' to open the playlist import dialog.

The courses in the playlist will be added to the Learning Path. Administrators can then enroll learners, who can immediately begin taking the courses.

## Manage Go1 playlists

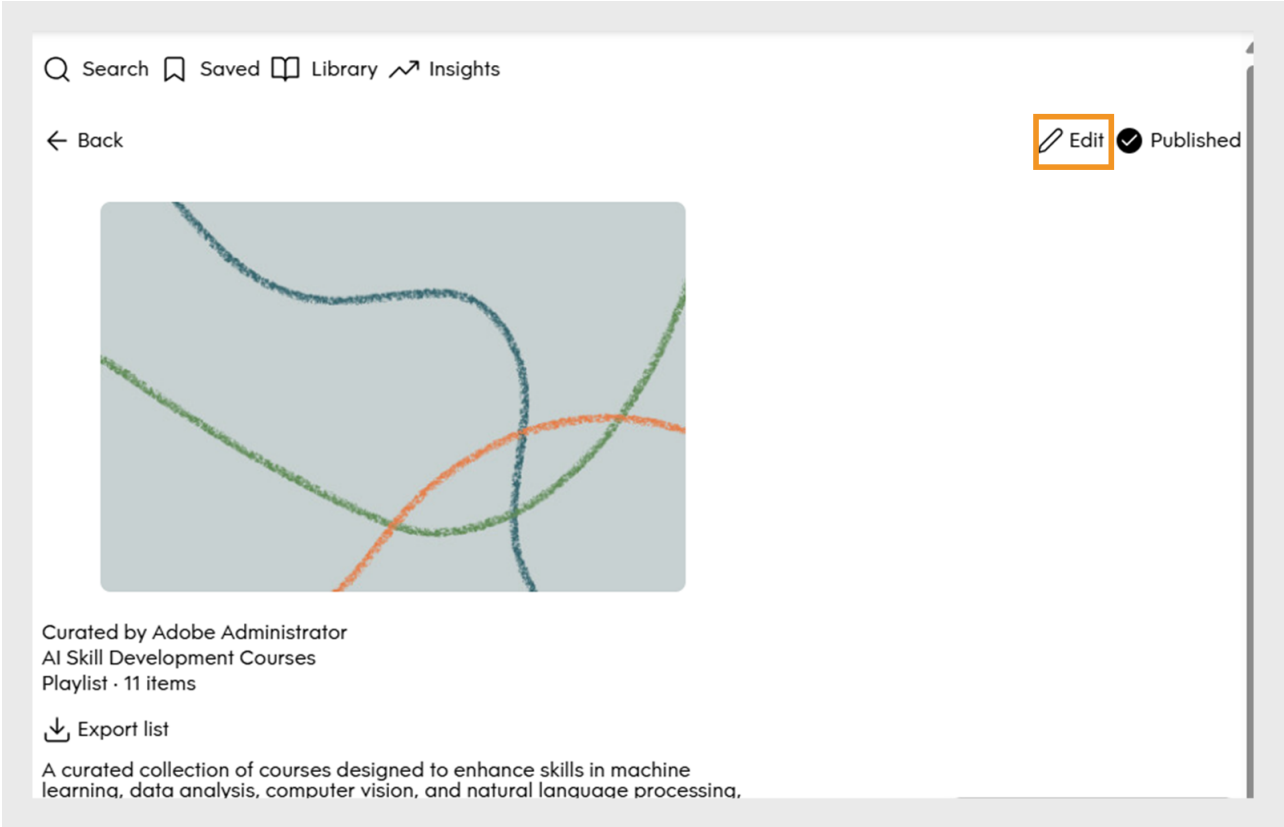

Administrators can manage created Go1 playlists by duplicating, sharing, or deleting them.

### Duplicate the playlist

To duplicate the playlist:

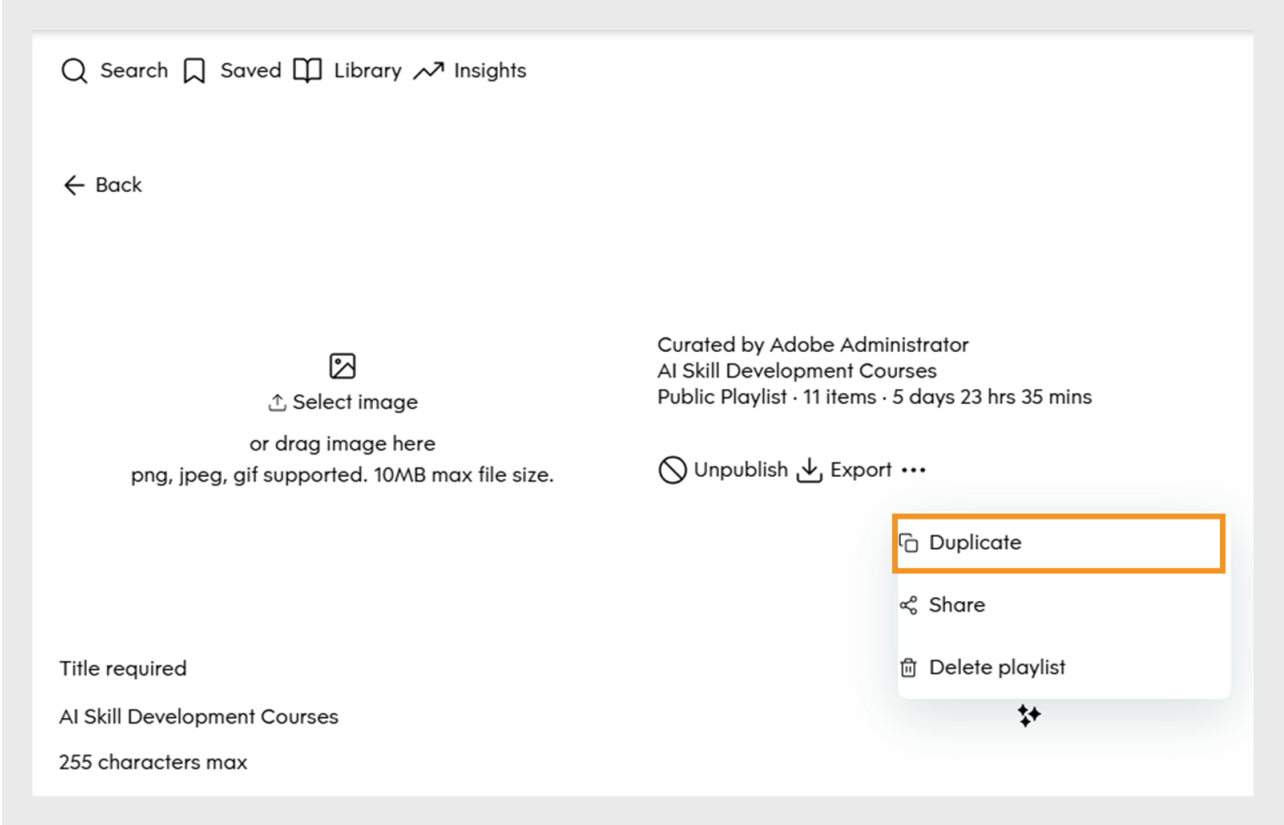

1. Log in to Adobe Learning Manager as an administrator.
2. Select **![UICONTROL Content Marketplace]**.

- 3. Select **[!UICONTROL Content Hub]** and then select **[!UICONTROL Library]**.
- 4. Select the playlist and then select **[!UICONTROL Edit]**.

Go1 playlist screen showing options to edit the playlist

- 5. Select the ellipsis and then select **[!UICONTROL Duplicate]**.

Playlist management screen, highlighting Duplicate option

The selected playlist will be duplicated and added to the Go1 content library

Delete the playlist

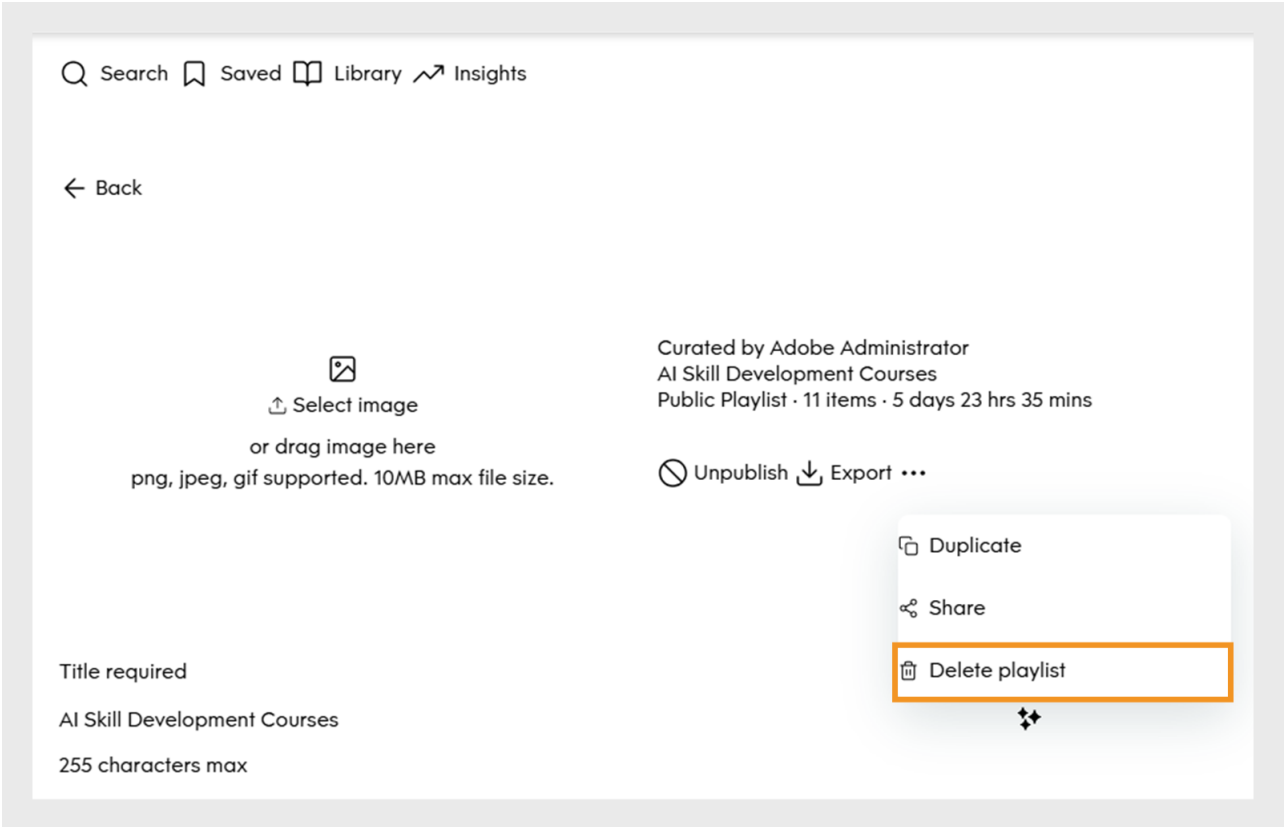

To delete the playlist:

- 1. Log in to Adobe Learning Manager as an administrator.
- 2. Select **[!UICONTROL Content Marketplace]**.
- 3. Select **[!UICONTROL Content Hub]** and then select **[!UICONTROL Library]**.
- 4. Select the playlist and then select **[!UICONTROL Edit]**.

Go1 playlist screen showing options to edit the playlist

- 5. Select the ellipsis and then select **[!UICONTROL Delete playlist]**.

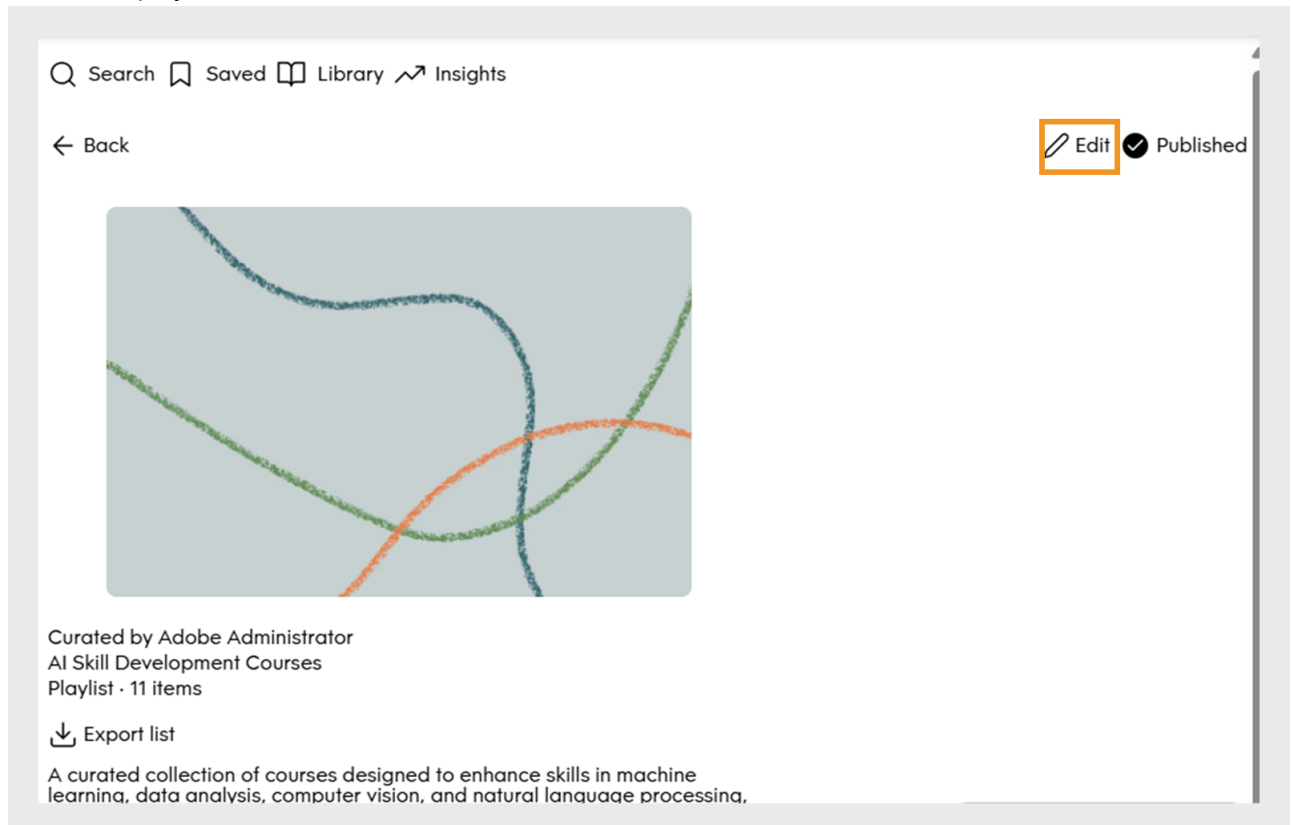

Playlist management screen, highlighting Delete playlist option

The selected playlist will be deleted from the Go1 library.

## Share the playlist

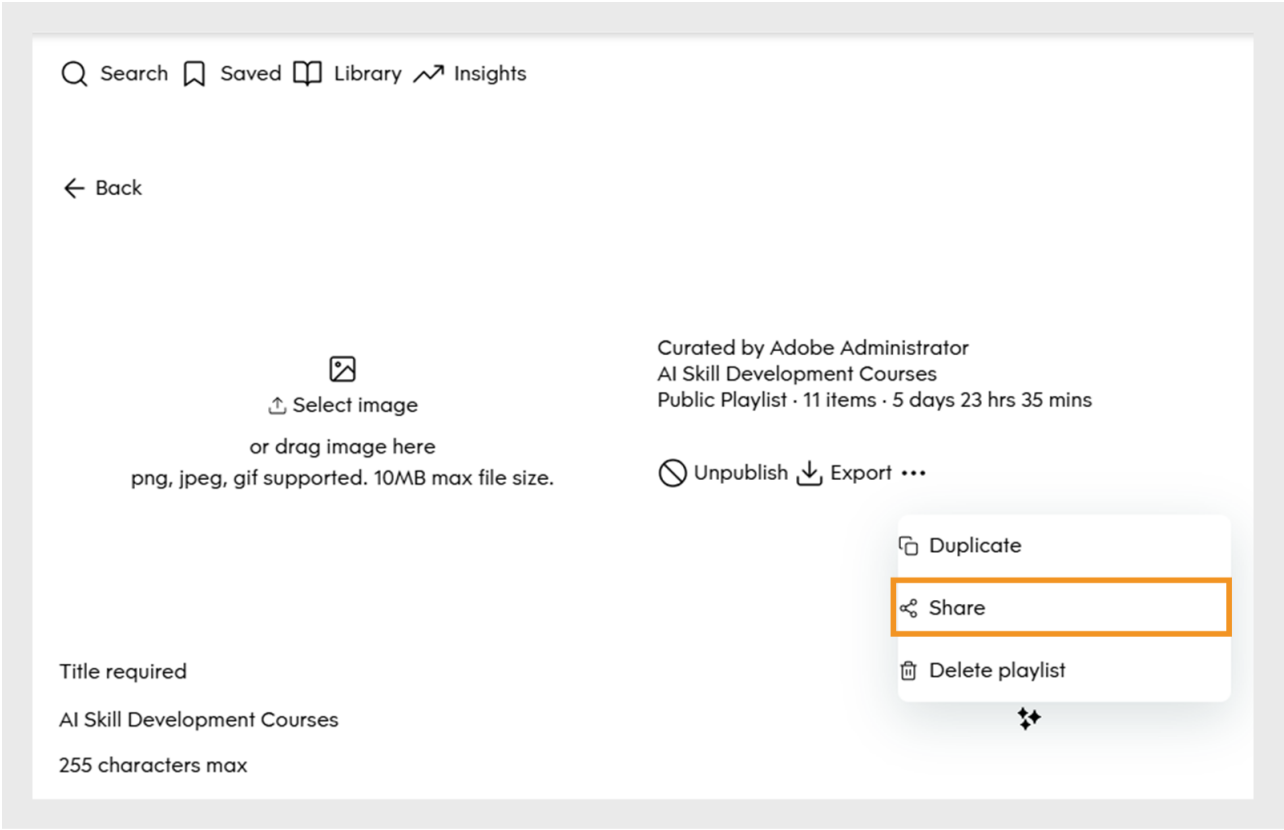

To share the playlist:

1. Log in to Adobe Learning Manager as an administrator.
2. Select **[!UICONTROL Content Marketplace]**.
3. Select **[!UICONTROL Content Hub]** and then select **[!UICONTROL Library]**.
4. Select the playlist and then select **[!UICONTROL Edit]**.

*Go1 playlist screen showing options to edit the playlist*

5. Select the ellipsis and then select **[!UICONTROL Share]**.

*Playlist management screen, highlighting Share option*

6. Select the users to share the playlist.

The selected playlist will be shared with added users.
