# Add Go1 playlist to a Learning Path

This feature allows administrators to directly curate and add Go1 courses learning paths and recurring certifications. Administrators can create a learning path that includes a Go1 playlist, so learners can access selected Go1 courses as part of their training.

> [!INFO]
>
> Customers with an active Go1 license can add Go1 courses to a learning path or certification.

To create a learning path:

1. Log in to Adobe Learning Manager as an administrator.

2. Select **[!UICONTROL Learning Paths]** in the left navigation pane.

3. Select **[!UICONTROL Add]**.
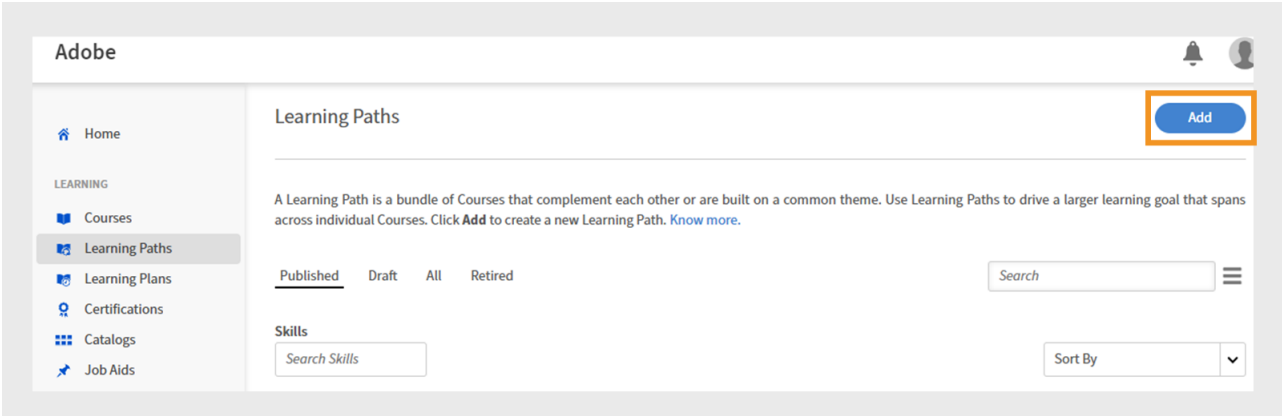

Select Add in the Learning Paths section to create and organize new structured training programs for your learners

4. Type the required details and select **[!UICONTROL Save]**. See this article for more information.

5. Select **[!UICONTROL Add Go1 Courses]**.
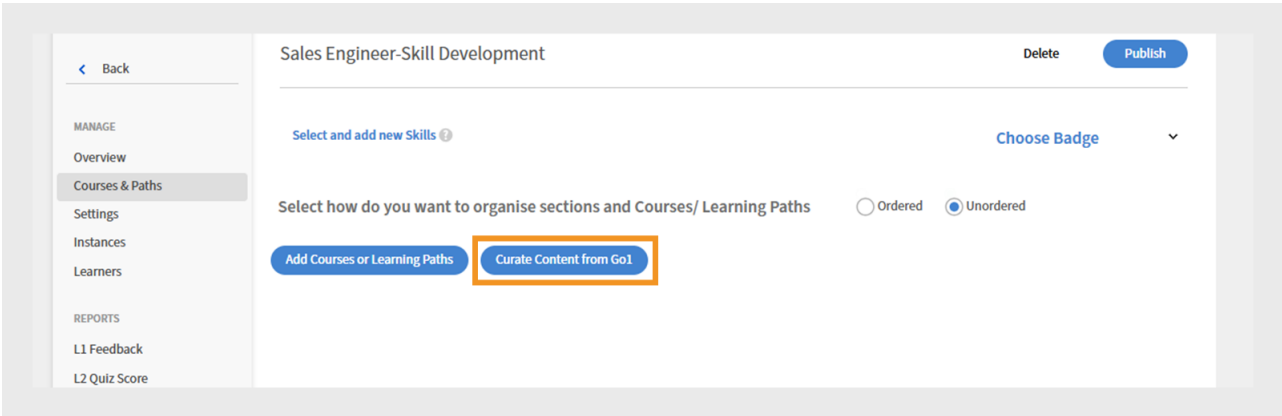

Add Go1 courses to your Sales Engineers Skill Development playlist to expand learning options with curated third-party content

6. In the **[!UICONTROL Library]**, search for and select **[!UICONTROL Create playlist]** and choose from one of the following: a. **[!UICONTROL with AI]**: Create a playlist with the help of AI. b. **[!UICONTROL by myself]**: Create a playlist by manually adding courses to it.

Create a playlist with AI

Administrators can type the playlist description in the AI prompt. The AI will curate the related courses and create a playlist based on the requirements. AI generates playlists by interpreting the learning goal or prompt provided by the user. When creating a playlist, admins can select to curate content 'with AI' which allows the system to use large language models to understand the specified learning objectives and content preferences like duration and type. The AI then searches the content library for relevant learning objects that match these criteria.
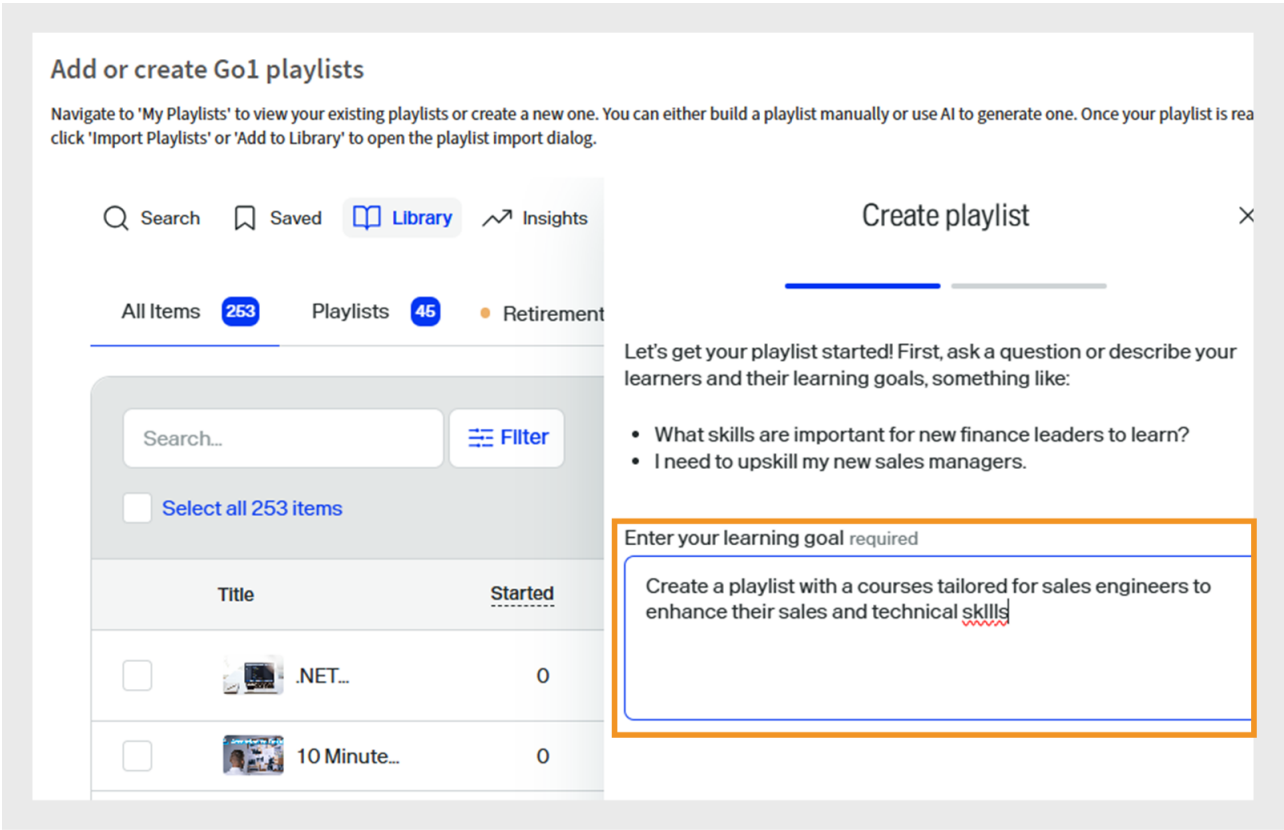

To create a playlist with AI:

1. Select **[!UICONTROL Create playlist]** and then select **[!UICONTROL with AI]**.
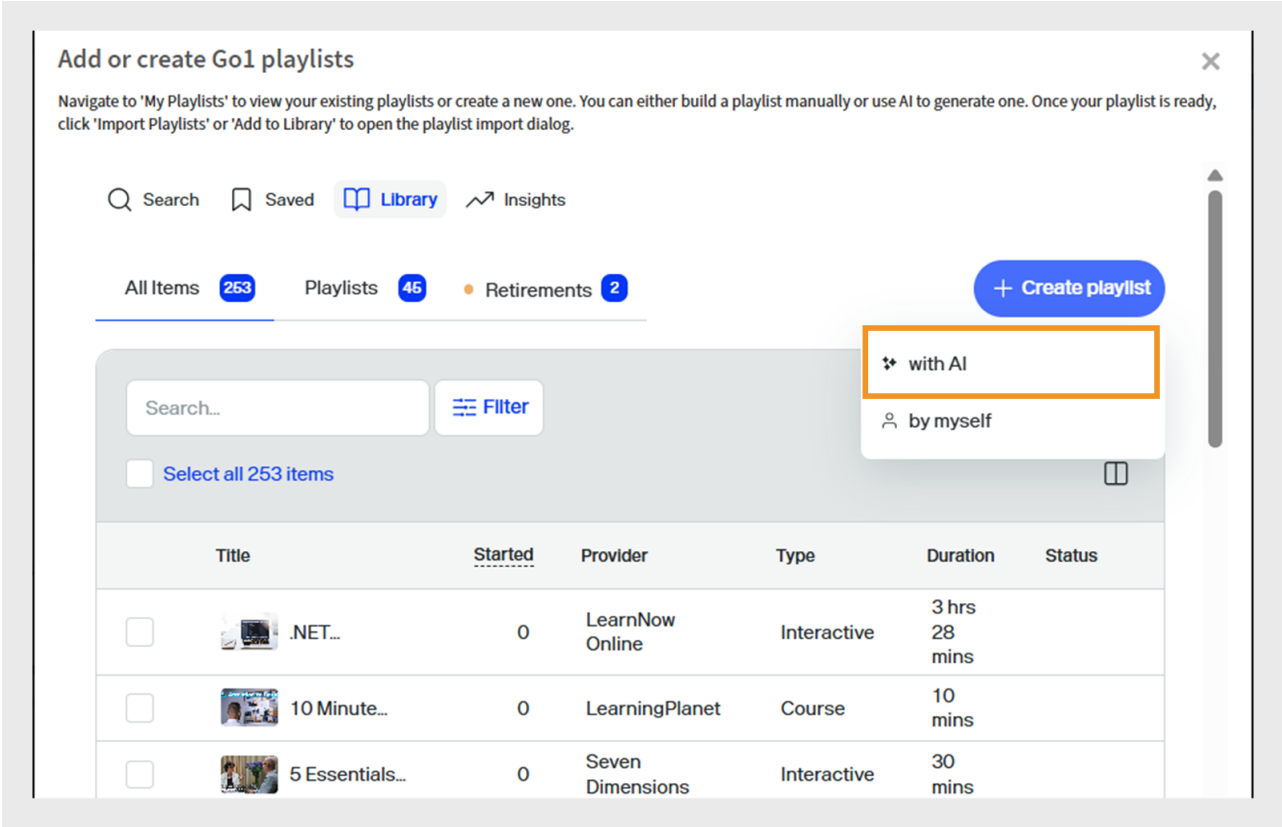

Create curated playlists with AI, which enables automated course recommendations tailored to learner needs

2. Type a short description about your playlist in the **[!UICONTROL Enter your learning goal]** text field.

3. Select **[!UICONTROL Next]**.

Type your learning goal to create a custom playlist, helping Adobe Learning Manager recommend targeted courses tailored to your learners' needs

4. Choose the skills from the list.

Add or create Go1 playlists   ✕

Navigate to 'My Playlists' to view your existing playlists or create a new one. You can either build a playlist manually or use AI to generate one. Once your playlist is ready, click 'Import Playlists' or 'Add to Library' to open the playlist import dialog.

ⓘ Create all playlists in Go1 and then sync to Adobe Learning Manager   **Import playlists**

Choose the skills from the list to curate the courses for the Sales Engineer

5. Select the course duration and type for your playlist.

6. Select **[!UICONTROL Generate playlist]**. The playlist is created with 10 courses, and administrators can use it to create a Learning Path.

Review your curated Sales Engineer Skills Enhancement Playlist in Adobe Learning Manager

7. Select **[!UICONTROL Add to Library]**.

8. Select **Yes** in the confirmation prompt.

9. Select the playlist from the **[!UICONTROL Select playlist to import prompt]**.
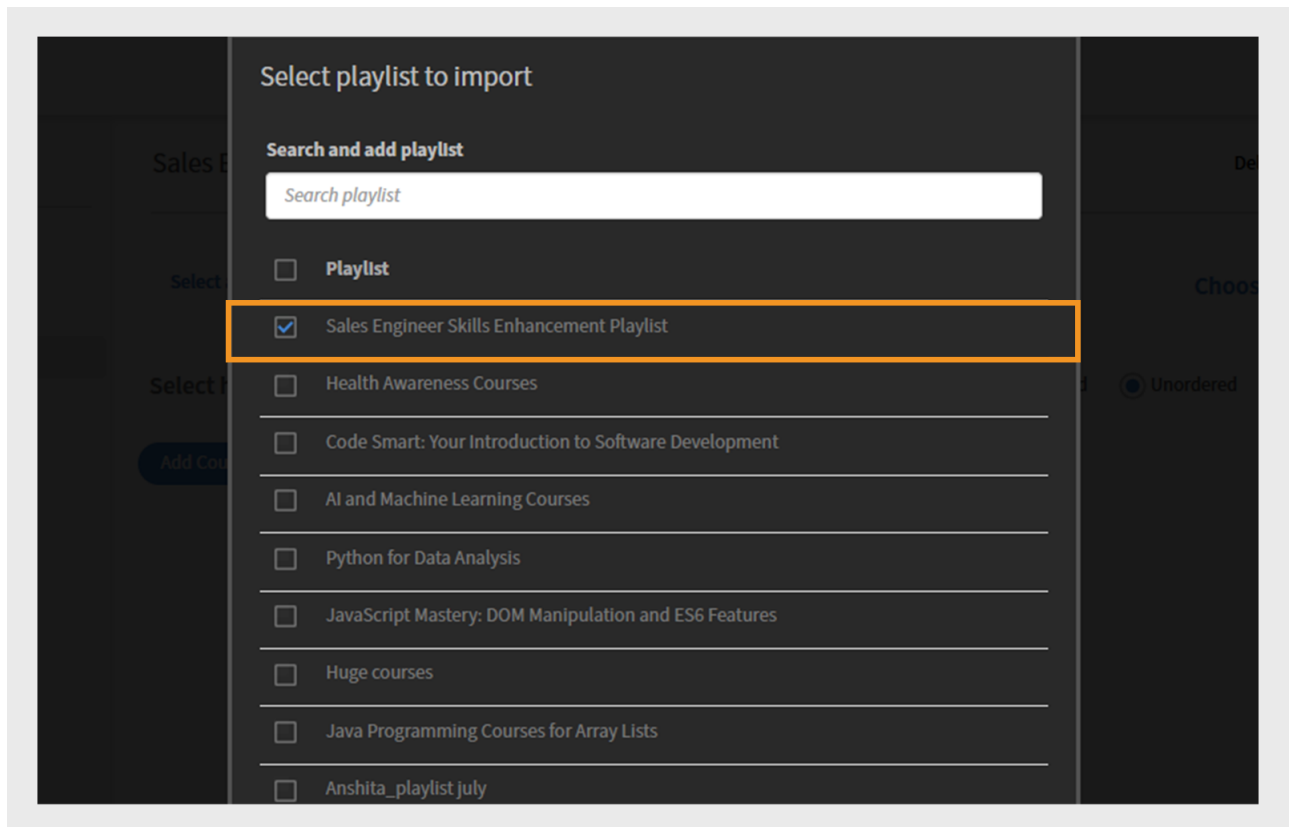

Select and import the Sales Engineer Skills Enhancement Playlist from the Go1 Library in Adobe Learning Manager

10. Select **[!UICONTROL Add Playlists to Learning Path]** and then **[!UICONTROL Publish]**.

The courses in the playlist will be added to the Learning Path. Administrators can then enroll learners, who can immediately begin taking the courses.

Create a playlist manually

Manually select courses that best match learners' requirements and curate additional relevant courses.

To create a playlist manually:

1. Select **[!UICONTROL Create playlist]** and then select **[!UICONTROL by myself]**.

Manually create a playlist giving administrators full control to curate courses based on specific learner needs

2. Type the title and description of your playlist.

Add a title and description to your playlist in Adobe Learning Manager to clearly define its purpose and help guide learners toward targeted skill development

3. Select **[!UICONTROL Create]**.

4. Select **[!UICONTROL Add item]** to add the related courses.

Add items to your Sales Engineers Skill Development playlist in Adobe Learning Manager to curate targeted courses

5. Search and select the required courses. The playlist has been created with related courses.

6. Select the playlist from the **[!UICONTROL Select playlist to import prompt]**.

7. Select **[!UICONTROL Add Playlists to Learning Path]** and then **[!UICONTROL Publish]**.

The courses in the playlist will be added to the Learning Path. Administrators can then enroll learners, who can immediately begin taking the courses.
